PROFESSIONAL PROFILE
Full Stack Developer with a scientific background. Third-place winner at the "Build For Her" hackathon with the app ICNU—a frontend demo designed to coordinate care for older adults. Proficient in Java/Spring Boot, REST APIs, JPA/Hibernate, JWT/OAuth 2.0, JavaScript, SQL, and JUnit/Jest, with experience in frontend-backend integration. Interested in software, data, healthcare, and sustainability.

TECHNICAL SKILLS
Java | Spring Boot | Spring Data JPA | Hibernate| APIs RESTful | MVC | JWT | OAuth 2.0 | JavaScript | HTML5 | CSS3 | Bootstrap | MySQL | R | JUnit | Jest | Git & GitHub | Postman | IntelliJ | VS Code | Figma | Railway | AWS

SOFT SKILLS
Project coordination | Communication with management and suppliers | Scrum | Technical documentation and evidence

ACADEMIC PROJECTS (HACKATHONS)
Frontend Developer | Hackathon Build For Her, app called ICNU, 3rd place (November 2026)
- I proposed the idea for the logbook, drawing on my experience as a caregiver, and defined the user flow for the MVP.
- I collaborated with OpenCode to refine the interface and functionality, ensuring the demo was fully operational.
- The demo facilitates the coordination of elderly care, covering areas such as caregiver profiles, patients, medical conditions, allergies, medications, appointments, tasks, emergency contacts, a logbook, notes, and a weekly summary.
- I validated the mobile and desktop user experience and recorded the demo video.

Java Developer | Contact List (October 2026)
- I developed the "Contact" builder, incorporating registration, searching, normalization, and validation; I also implemented unit tests using JUnit as part of a four-person team.

Frontend Developer | “Tierra deportiva” landing page (September 2026)
- I designed the HTML structure and the products section; enhanced the carousel using JavaScript; rebuilt the penultimate version; and reorganized the workflow to ensure no progress was lost.

WORK EXPERIENCE
Full Stack Developer | Sketch and coffee (September 2026 – November 2026)
- I implemented REST endpoints using Spring Boot (MVC) and persistence via JPA/Hibernate.
- I fixed bugs in the CRUD operations for Categories, Orders, and Users, and adjusted HTTP status codes (201, 404, 409).
- I integrated the frontend and backend for deployment on Railway and AWS.
- I developed the header, hero section, and color palette, and implemented validations for the contact form.
- I wrote tests using JUnit and Jest, and documented deployment issues along with their remediation.

Data Specialist for AI | Freelance (October 2024 – July 2026)
- Evaluated, curated, and collected data for LLMs and computer vision at RWS, Scale AI, and Outlier; specialized in Spanish-language data and CC 4.0-licensed content.
- Over 2 years of experience working 100% remotely and independently, delivering international projects for global clients.

Project Coordinator | Kuturabi (May 2022 – March 2026) | Full-time
- I coordinated a plant nutrient pilot plant from start to finish (2.5 years), managing scope, suppliers, and budget.
- I oversaw facility upgrades and prepared the documentation required for the sanitary license application.
- I secured $491,262 MXN in funding through the IDEA GTO program.
- I developed over 50 dashboards in ThingsBoard and executive reports in R, and implemented a document control system in Nextcloud.
- I delivered monthly data on time and responded to client requests within 1–2 business days.

EDUCATIONAL BACKGROUND
- Full-Stack Java Development | Generation Mexico Bootcamp (August 2026 – November 2026)
- Master of Science in Integrative Biology | CINVESTAV (August 2019 – May 2022) | Degree Earned
- Bachelor’s Degree in Biotechnology | Universidad Autónoma del Estado de México (August 2013 – May 2019) | Degree Earned

COURSES
- Preparatory Course at the Public Center for Artificial Intelligence Training | Tecnológico Nacional de México (September 2026)
- Introduction to Java | Accenture (August 2026)

LANGUAGES
- **English** | B2 | Professional proficiency
