Lizeth Dorantes Gómez

Junior Full Stack Java Developer

lzethdg@gmail.com | Toluca, Estado de México | Relocation availability

LinkedIn: lizeth-dorantes | GitHub: Zeth-DG | Portfolio here

PROFESSIONAL PROFILE

Full-stack developer with a scientific background. Proficient in Java, JavaScript, SQL, and testing (Jest, JUnit), with experience in data for AI (RWS, Scale AI, Outlier) and four years of experience coordinating environmental IoT projects at an agrotech startup. I am interested in the intersection of software, data, and sustainability.

TECHNICAL SKILLS

JavaScript | HTML5 | CSS3 | Bootstrap | Java 21 | Spring Boot | SQL | R | Arduino | Git | GitHub | Trello | Postman | IntelliJ | Figma

SOFT SKILLS

Coordination and communication: 4 years serving as a liaison between management, consultants, and technical vendors. | **Analysis**: Developed 50+ dashboards and monthly executive reports using R. | **Self-taught:** Transitioned from a background in biotechnology to completing a Java Full Stack bootcamp in 3 months. | **Teamwork**: Collaborated with management, consultants, and external vendors for 4 years at Kuturabi. Served as Scrum Master/Product Owner for a 7-person team during an 8-week project.

ACADEMIC PROJECT

Developer | Contact List (October 2026)

- A Java console application using a HashMap for contact management, featuring contact addition (with validation for duplicates and empty fields), searching, sorted listing (via TreeMap), and deletion.
- Working in a team of four over the course of six hours, I developed the `Contact` class constructor, the logic for adding contacts, the mechanism to check for existing entries, input normalization, and validation to ensure fields are not left empty.

Developer | “Tierra deportiva” landing page (September 2026)

- I defined the concept, the core messaging, and the visual and narrative approach for a sports-related landing page, establishing the project's creative direction.
- I designed the foundational HTML structure and the product section, creating the framework upon which the team built the rest of the site.
- I enhanced the carousel navigation using JavaScript logic and reconstructed a near-final version of the project following a loss of data, successfully recovering the team's progress.

WORK EXPERIENCE

Full-stack developer | Sketch & Coffee (September 2026 – November 2026)

- I developed the header as a reusable component, along with the hero section and the header color palette for the e-commerce site, using HTML, CSS, and JavaScript.
- I implemented contact form validations, supported by unit tests in Jest.
- I designed prototypes for the "Contact" and "About Us" pages in Figma, and rotated between the roles of Scrum Master and Product Owner within a 7-person team over the course of 8 weeks.

Data Specialist for AI | Freelance (October 2024 – July 2026)

- I evaluated quality, curated content, and collected data for language models and computer vision at RWS, Scale AI, and Outlier. Specialized in Spanish-language content and the verification of CC 4.0 licenses.
- Outlier (Jun–Jul 2026) · Scale AI (May 2025–May 2026) · Outlier (Dec 2025–Jan 2026) · RWS (Oct 2024–May 2025)
- I worked 100% remotely and autonomously for over 2 years, meeting project delivery criteria for international clients based in the U.S.

Project Coordinator | Kuturabi (May 2022 – March 2026)

- I managed a pilot plant project from start to finish over 2.5 years (1.5 years for execution and 1 year for administrative procedures), coordinating the project scope, vendors, budget, and environmental monitoring devices (including sales, support, and the development of new prototypes).
- I created over 50 dashboards in ThingsBoard and produced monthly executive reports using R. Additionally, I led the effort to secure $491,262 MXN in funding through the IDEA GTO program and implemented a document control system in NextCloud.

EDUCATION

- **Generation Mexico Bootcamp** | Full-Stack Java Developer (August 2026 – November 2026)
- **M.Sc. in Integrative Biology** | Degree awarded | CINVESTAV (August 2019 – May 2022)
- **B.Sc. in Biotechnology** | Degree awarded |Universidad Autónoma del Estado de México (August 2013 – May 2019)

COURSES

- **Propedéutico del Centro Público de Formación en Inteligencia Artificial** | Tecnológico Nacional de México (Septiembre - 2026)
- **Introduction to Java** | Accenture (August 2026)

LANGUAGES

- **English** | B2
